Test execution summary and closure

Scope and environment

Application	StreetBite V1.0 (1.0.0+1)
Build under test	Debug APK
Primary device	Samsung SM-A366B (real device)
Secondary device	Android emulator
Tester	Shahd Zain
Test period	2026-10-16 to 2026-10-18
Defect tracker	Jira

Yellow cells above are assumptions taken from the project setup. Edit them if they changed.

Execution results

Group		Total	Pass	Fail	Blocked	Not run
All cases		41	39	1	1	0
Screen: Login		20	20	0	0	0
Screen: Home		21	19	1	1	0
Type: GUI		11	11	0	0	0
Type: Positive		13	12	1	0	0
Type: Negative		11	10	0	1	0
Type: General Mobile		6	6	0	0	0
Pass rate (of executed cases)		95.1%				
Executed (Pass + Fail + Blocked)		100.0%				

Defects (from DefectLog)

Severity		Total	Not closed
Critical		0	0
High		0	0
Medium		1	1
Low		0	0

Exit criteria

Criterion	Target	Actual	Result
Minimum pass rate	90%	95.1%	Met
All planned cases executed	100%	100.0%	Met
No open Critical or High defects	0	0	Met
Every Fail has a Bug ID	0	0	Met
Every requirement has at least one case	0	0	Met
Overall exit decision		**Exit criteria met**	

Closure summary (fill in after execution)

Overall outcome	41 cases were executed on the Samsung SM-A366B: 39 Pass, 1 Fail and 1 Blocked (pass rate 95.1%). All exit criteria are met.
Main findings	Login (validation, wrong and unknown credentials, session persistence, offline message) and Home (banner, Hot Offers, grid, cart, theme and language, cache) behave as specified. One defect was found: SB-1, cached meals are shown without photos when the phone is offline (TC_HOME_014). The smoke checklists from the Test Plan (Meal Details, Cart, Vendor Map and Profile) were also run on the Samsung SM-A366B and worked as described; no defects were found there.
Open risks and known issues	SB-1 is open (Medium severity, Low priority). TC_HOME_016 (meal service down with no cache) is Blocked because meals are cached after the first load and the meal API is reachable, so that error state could not be produced. Only one physical device was used.
Recommendation	Ready for the beta release. Cache the meal photos so that Home looks complete offline, then re-test TC_HOME_014 on the same device.
